UI Bug Report - S3 Website

Field	Description
Issue ID	Bug_001
Title	There is a Spelling error in the Products and Contact page
Severity	Minor
Priority	High
Steps to reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. Click "Company" in the top navigation menu and observe its content. 3. Click "Contact" in the top navigation menu and observe its content.
Expected results	The products and Contact pages shouldn't contain any Spelling errors
Actual Results	There is a Spelling error in the Products page, the "experiement" exists instead of "experiment"
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Title	Search functionality not working and placeholder text acts as actual input value.
Severity	Major
Priority	High
Steps to Reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. Click inside the search box — observe the text. 3. Click Enter.
Expected Results	1. The search box should display "Search" as placeholder text (faded, disappears on click). 2. The Clicking inside the search box should clear the placeholder automatically. 3. Search functionality should return relevant results
Actual Results	1. The word "Search" is pre-filled as normal text, not placeholder. 2. The user must manually erase it before searching. 3. Clicking the search button does not return any results.
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Title	All product category links redirect to the same page instead of their respective category pages
Severity	Critical
Priority	High
Steps to Reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. Locate the Product Application Categories section on the left side of the home page. 3. Click on any category (e.g., Adhesives). 4. Repeat step 2 for another category (e.g., Lubricants and Greases, etc..).
Expected Results	Each category link should open its own unique product page containing relevant information for that category.
Actual Results	All category links open the same page, regardless of the selected category.
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Title	Contact Information in Header Does Not Match Contact Information in Contact Section
Severity	Medium
Priority	High
Steps to Reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. Observe the phone number under the site name "Acme Chemicals" in the header. 3. Navigate to the "Contact" page or section. 4. Compare the phone number(s) listed in the contact section with the one in the header.
Expected Results	The contact information in the header and the contact section should be identical and consistent.
Actual Results	The phone number under the site name (503.555.7777) does not match any of the numbers listed in the contact section ((503) 591-3610 Direct, (800) 591-3620 Toll-free, (503) 223-7054 FAX).
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Field	Description
Issue ID	Bug_009
Title	Verify Website Name in Header is Too Small and Lacks Visual Prominence.
Severity	Medium
Priority	Low (Design Issue)
Steps to Reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. Observe the placement, font size, and visibility of the website name ("Acme Chemicals") in the header. 3. Compare the visibility with other elements such as navigation links and content text.
Expected Results	The website name should be large, bold, and easily noticeable at first glance, maintaining a clear brand presence.
Actual Results	The website name appears small and less prominent than surrounding elements, making it easy to overlook.
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Title	Poor layout with large unused empty green areas reduces usability.
Severity	Medium
Priority	High (Design Issue)
Steps to Reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. Look at the sides of the main content area.
Expected Results	Page layout should be optimized to make better use of available space.
Actual Results	Large, empty green areas waste space and make the design look unprofessional.
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Title	Printable Product List" Link Opens Unrelated PDF in Same Tab.
Severity	Medium
Priority	Medium
Steps to Reproduce	1. Open the website "http://s3-design-sample-site.s3-website-us-west-2.amazonaws.com/company.html". 2. From the left-hand product list, click "Printable Product List.".
Expected Results	A PDF or printable version of the website's product list should open in a **new tab/window** and be directly related to the products on the site.
Actual Results	1. A PDF opens in the same browser tab. 2. The PDF content is unrelated to the website's products.
Environment	(OS:Windows10, Browser: Chrome 139.0.7258.66)

Design Issues & Suggestions for Usability & Performance:

1. Page Title is "Untitled Document"

- **Issue:** The browser tab displays “Untitled Document” instead of a meaningful title.
- **Impact:** Reduces professionalism and harms SEO (search engine optimization).
- **Suggestion:** Use descriptive and keyword-rich titles for each page (e.g., *"Acme Chemicals – Home"*, *"Acme Chemicals – Products"*).

2. Contact Information Alignment

- **Issue:** Contact information ("Acme Chemicals", phone number) is not well-centered or aligned visually with surrounding elements.
- **Impact:** Makes the UI look unbalanced and less professional.
- **Suggestion:** Adjust CSS layout to properly align and center contact details within the header or sidebar for better visual hierarchy.

3. Product Categories Navigation

- **Issue:** All product category links open the same page.
- **Impact:** Misleads users, breaks navigation expectations, and reduces usability.
- **Suggestion:** Ensure each category link directs to its correct content page. If some categories are not ready, temporarily disable or mark them as "Coming Soon."

4. Use of Deprecated Adobe Flash Content

- **Issue:** Homepage content relies on Adobe Flash Player, which is no longer supported in modern browsers.
- **Impact:** Central content is completely inaccessible to all users.
- **Suggestion:** Replace Flash-based content with HTML5, CSS3, or JavaScript-based alternatives for full browser compatibility and better performance.

5. Search Functionality

- **Issue:** Search box contains the word "Search" as actual text, requiring manual deletion before typing. Search results also seem non-functional.
- **Impact:** Frustrates users and disrupts search flow.
- **Suggestion:** Use placeholder text for the search bar that disappears automatically when the user clicks inside. Implement functional search backend or disable the feature until ready.

6. Color Contrast & Readability

- **Issue:** Green background with white text in the product categories sidebar may cause readability issues for some users.
- **Impact:** Poor accessibility for users with visual impairments; may fail WCAG accessibility standards.

- **Suggestion:** Use higher-contrast color combinations (e.g., darker text on a lighter background).

7. Missing Responsive Design

- **Issue:** Layout does not adapt well to smaller screens or mobile devices.
- **Impact:** Reduces usability for mobile users (who may be a large portion of traffic).
- **Suggestion:** Implement responsive web design using CSS flexbox/grid and media queries.

8. Performance Optimization

- **Issue:** Heavy and outdated assets (e.g., Flash, large images) slow page load times.
- **Impact:** Poor user experience and lower SEO ranking.
- **Suggestion:** Optimize images, remove unused scripts/styles, and implement modern content delivery techniques.
